**SIEMENS VDO**

# SIEMENS VDO

With many years of extensive experience in the development and manufacture of precision, high quality instruments, Siemens VDO Automotive has been able to develop an extensive range of Automotive, Commercial and Marine products that have exceeded worldwide expectations.

The success of Siemens VDO Automotive product ranges can be attributed to leading edge technology, easy operation and reliability.

Designed for the toughest environments the comprehensive Automotive and Commercial products will suit a large range of vehicles and conditions.

Marine products range from engine monitoring to navigation instruments for pleasure craft and commercial vessels.

This catalogue brings together the most comprehensive range of security products and instruments including Cockpit Vision, Cockpit White, Cockpit International, Titanium, Heritage Gold, Cockpit Royale along with a complete range of senders and accessories.

# Siemens VDO Automotive Warranty Policy

Siemens VDO Automotive (SVA) warrants the goods against defects in factory workmanship and materials within the warranty period.

The warranty period for automotive, commercial and marine products shall be 24 months from the date of invoice, subject to the usage limitation of 100,000 Km for goods installed in commercial vehicles.

The warranty period for audio and navigation products shall be 24 months from date of invoice.

The warranty period for repaired items shall be 90 days from the date of invoice.

The customer must notify the point of purchase / distributor of any defect coming within the provisions of this warranty within 30 days of the fault occurring.

A copy of the relevant invoice or the relevant invoice number as proof of the date of purchase must be provided with returned goods.

SVA liability with respect to this warranty shall be limited at the option of SVA to repair or replacement of the goods.

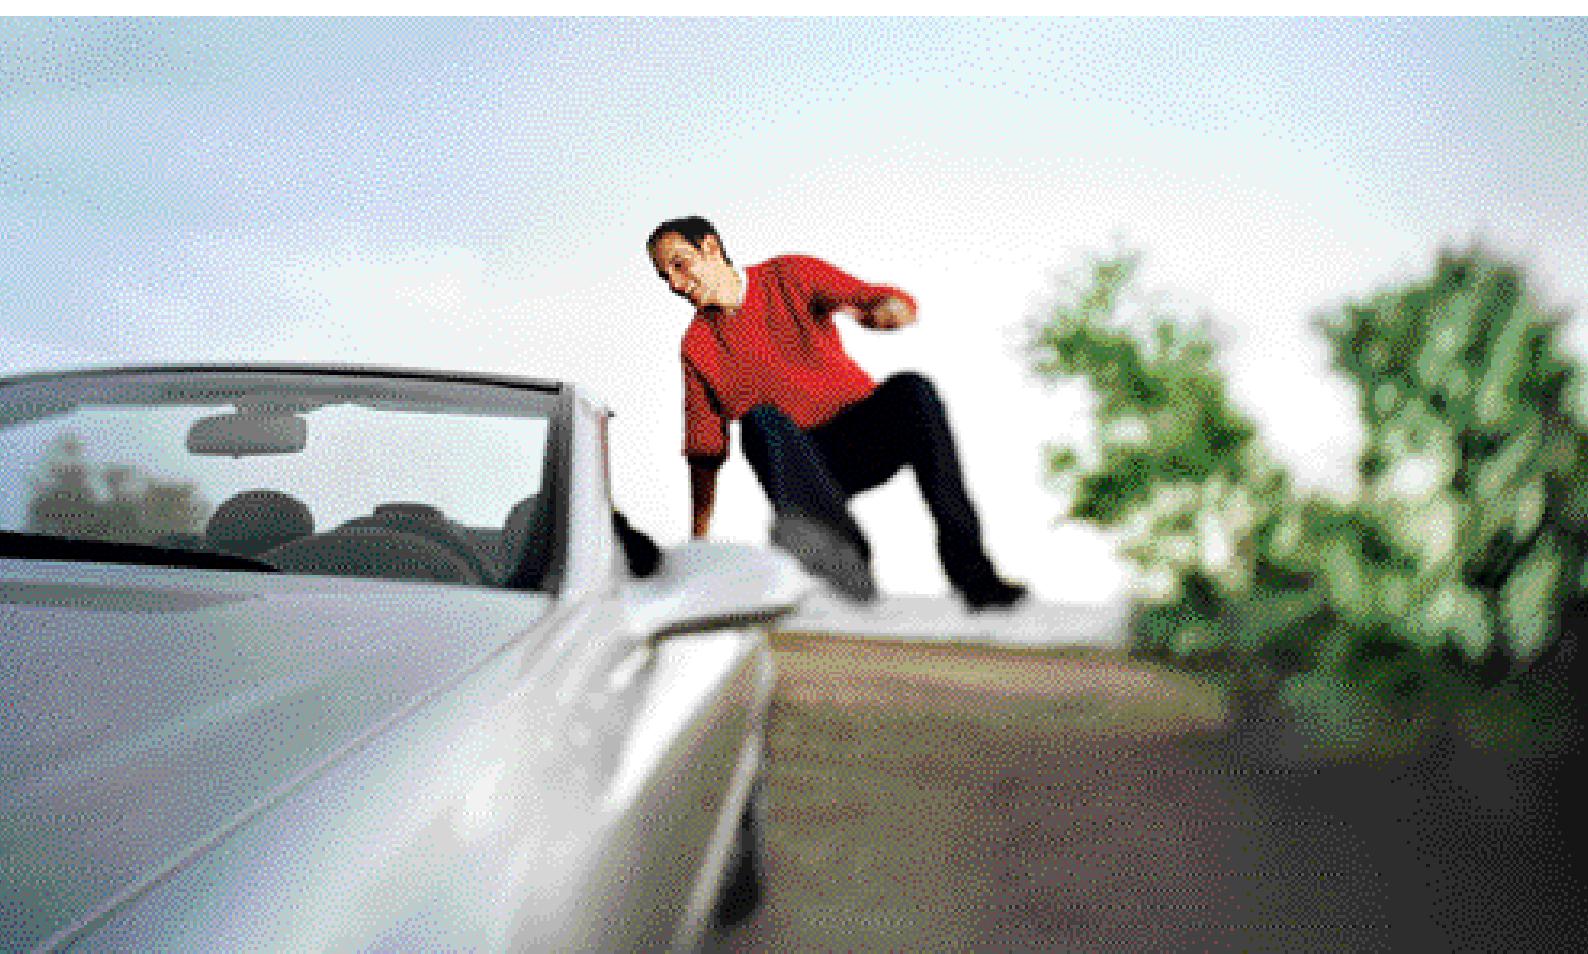

Removal and refitting costs and all freight costs associated with the warranty claims are the responsibility of the customer.

This warranty shall not apply to goods which have been opened by a third party.

Contaminated by oil, water or grease, fitted in

excessive vibration environments or improperly connected. Glass and capillary breakages are excluded from the provisions of this warranty. Save and except for the express warranty set out above and to the maximum extent permitted by law, all conditions and warranties which may at the time be implied by common law, Trade Practices Act, Fair Trading Act, Goods Act or any other state or Federal Act are excluded. To the extent that these cannot be excluded and where the law permits. SVA's liability in respect of any such condition or warranty, shall be limited at the option of SVA to repair or replacement of the goods or the supply of equivalent goods or the payment of the costs of the replacing or repairing the goods, or having them replaced or repaired.

# Cockpit Vision

Cockpit Vision is the pinnacle of instrument technology. It represents latest advances in instrument illumination and installation techniques. Using fibre-optic technology to illuminate the pointer and VDO's Trioptic through dial lighting we achieve superb night time illumination.

The installation technique used, where possible, disregards U-brackets and studs and features instead a 360° locking ring thereby eliminating panel warping and gauge rotation. We call it the VDO Spin-lock.

## SPEEDOMETER

Illumination through dial and pointer. 12V globe included.

Field adjustable to suit 500 to 400,000 imp/km by pulse setting, or auto-calibration function through LCD readout via reset button. Total distance 999,999.9 not resettable. Speed display analogue; Odometer and trip distance LC-display trip distance 99,999.9 resettable.

Signal source Hall-effect, inductive or blocking oscillator sender units.

For 24V application use globe #240.053 (2 required).

For matching sender units refer to pages 75 and 76.

**Note:** 8 pin plug kit part no. 340.824 required. Not included in kit.

## TACHOURMETER

Suitable for most petrol and diesel engines. Adjustable through LCD and reset button. Field programmable to 1, 2, 3, 4, 5, 6, 8 or 12 cyl./4-stroke, 1, 2, 3 or 4 cyl./2-stroke ignition and alternator pick-up ("W" terminal). Also suitable for signal from generator or inductive sender unit. Incorporated hourmeter shows true engine hours.

Operating hours 99,999.9. Pulse range 0.5-200 pulses per rev.

Illumination 12V included. For 24V application use globe #240.053 (2 required).

For matching sender units refer to page 75 and 76.

## TEMPERATURE GAUGES, mechanical

Suitable for most vehicles.

Process connection is 1/8"-27NPTF threaded removable thermowell.

Temperature is transmitted via capillary tube.

Coil up excess capillary tubing - **do not cut to shorten!**

Illumination 12V included.

Adaptors are listed on page 66.

## AMMETERS, with internal shunts

Suitable for most engines which require battery and charging system monitoring.

Voltage dependent - suitable for 12V or 24V.

Ammeters with internal shunt are easily identified by the heavy duty threaded terminals on the back of the instrument.

Illumination 12V included.

Ammeter with Internal Shunt		52mm	
Part No.	Description	Specifications	Voltage
190077006	30-0-30 amp gauge	use 6mm wire	12V
190077007	60-0-60 amp gauge	use 6mm wire	12V

## AMMETER, with external shunt

Suitable for monitoring heavy duty electrical charging system.

Voltage dependent - suitable for 12V or 24V.

Illumination 12V included. For 24V application use drop resistor N05801180 and globe 240.051.

## AMMETER, with internal shunt

Suitable for most engines. Monitors Charge and battery condition.

Voltage independent – suitable for 12V or 24V.

Ammeters with internal shunt are easily identified by the heavy duty threaded terminals. Heavy duty wire must be used for wiring.

Illumination 12V included. For 24V application use globe #240.053.

Ammeter			52mm
Part Number	Range	Installation Ø	
190 037 002	60-0-60 amp	52mm	
190 037 003	100-0-100 amp	52mm	

**Note:** For installation use 6mm wire. Max length 15m.

## AMMETER, with external shunt

Suitable for most engines. Monitors Charge and battery condition.

Illumination 12V included.

For 24V application use drop resistor #240.701 and globe #240.051.

Ammeter			52mm
Part Number	Range	Installation Ø	Voltage
190.505	150-0-150AMP	52mm	12V

Complete kit consisting of instrument, shunt and loom.

**Note:** For shunt installation, use 10mm wire.

# Heritage Gold / Cockpit Royale

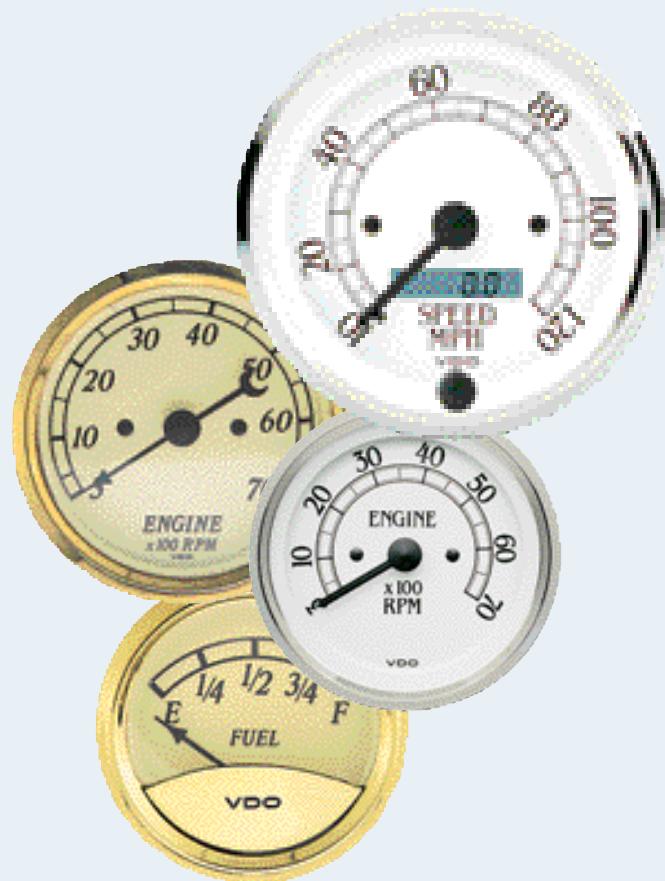

Heritage Gold instruments are the ultimate in classic style. Manufactured to the same stringent production and quality requirements as all VDO products. They incorporate yesterday's style with today's technology.

Cockpit Royale gauges are the perfect choice for the custom car builder who wants the look of the 30's and 40's.

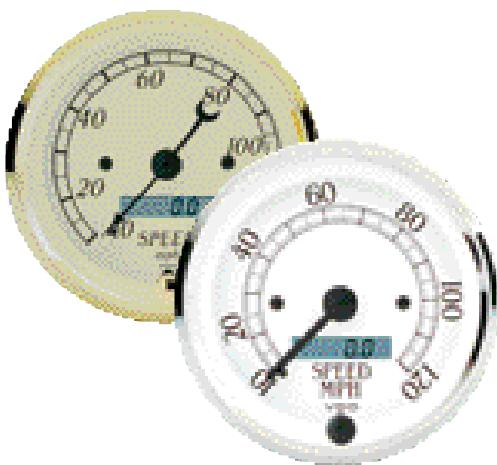

Brilliant chrome bezels and crisp white dials contrast with flat black typography authentic to the period and black pointers give the instruments a truly unique look.

As with all VDO instruments behind the stylish exterior is up to date technology.

## INSTRUMENT KITS

The new VDO gauge kits offer high impact presentation for our classic and vision ranges of gauges. The four new kits cover the popular automotive ranges and provide consumers with a first hand look at each range in a dashboard configuration.

Each kit is supplied with the necessary sender units to suit each gauge. Adaptors for sender units may be required for some vehicle applications.

## CENTRAL LOCKING KIT

The VDO Central Locking Kit is a universal kit which converts standard locks to key operated central locking, with master actuators for both front doors. This unit can be integrated with most remote controlled alarms and immobilisers for full keyless entry. The kit includes all necessary hardware, 4 actuators, wiring loom and control box. Can be integrated to VDO immobilisers part numbers: 900.600, 880.505, 880.555 and X10722002001 (Easy lock).

## REMOTE CONTROLLED IMMOBILISER (Australian Standards Approved)

The VDO remote controlled immobiliser features a high level of security, with the added convenience of keyless entry where central locking is fitted to the vehicle. Features include 2 point on board immobilisation, all black wire harness, auto immobilisation, status LED, indicator lamps output, 2 code hopping remote transmitters, boot release output and full central door locking relay output. Interfaces with VDO central locking #880.700 and most factory central locking systems (some vehicles may require additional actuator #880.003 for drivers door). Upgradeable to full alarm systems by adding siren #880.013, shock sensor #880.700 and/or microwave sensor #880.006.

## PAGER CAR ALARM

The VDO LCD Pager alarm provides all the benefits of an alarm/immobiliser with the added bonus of a LCD Pager so that the owner can monitor the status of the car from up to 600 to 800 metres away. The owner is notified by a visual, acoustic or vibration alert by the pager if the alarm is triggered. Features include 1 LCD Pager/transmitter, 1 code hopping transmitter, 1 external immobilisation, entry point protection, 2 stage shock sensor, battery backup mini siren, indicator lamp output, boot release output options programmable using remote transmitter, glass mount extended range transmitter and full central door locking relay output. Interfaces with VDO central locking #880.007 and most factory central locking systems (some vehicles may require additional actuator #880.003 for drivers door).

## VDO LOW WATER ALARM

Warning Light 170.708

The VDO Low Water Alarm electronic module monitors current continuity while the low water level probe is submerged in water. The location of the probe in the radiator or header tank determines the critical water level. Warning occurs within a few seconds of this level being reached. The flashing warning light and continuously activated buzzer can only be cancelled by switching off the engine. The circuit design features a functional check which is carried out every time the ignition is turned off. It also includes a delay action to avoid premature triggering.

**Note: For aluminium core radiators, fit water level probe to vehicle thermostat housing.**

## SPEED ALERT

Avoid expensive speeding fines and license suspension by installing a VDO Speed Alert. Features include acoustic and visual warnings when set speed is exceeded, with 1km/h increments for set speed. Headlight "On" alert provides acoustic and visual warning when headlights are left on and ignition is switched off. Suitable for both electronic and mechanical speedometers. Easy calibration for all cars. Double sided tape mounting.

For transmission mounted speed sender adaptors, refer to page 75 & 76.

Speed Alert		12V
Part No.	Description	Size
124.110	Speed Alert Kit. Suits electronic speedometers	70x45x22mm
124.120	Speed Alert Kit. Suits mechanical Speedometers	70x45x22mm

## REVERSE WARNING SYSTEM

The VDO Reverse Warning System provides a visual and acoustic alarm signal in stages when an obstacle reflects the ultrasonic wave. The system is activated automatically when the reverse gear is engaged. Features three range settings.

Reverse Warning System		12V
Part No.	Specifications	
X10730002001	Warning @ - 50cm, 100cm, 150cm	

## DIGITAL CLOCK

24 hour panel mounting digital clock, featuring green LED display.

Digital Clock		12V
Part No.	Specifications	Size
370.304	24hour	102x40mm
370.311	12 Hr - Digital Display On / Off Alarm function	102x40mm

## TYRE PRESSURE GAUGE

For the conscientious driver who likes to retain a consistent tyre pressure. Supplied in a handy leather pouch. Dual scale bar/psi.

Tyre Pressure Gauge	
Part No.	Range
150.050	0-4.5bar (0-64psi)

Switch Box 410.061

## ELECTRONIC ADJUSTABLE SWITCH BOXES

Designed to be used in conjunction with VDO electric temp or pressure gauges with senders, or can be used using VDO senders only (extra resistor 1K, 1W required).

Ideal for switching warning lamps, buzzers, external relays, thermofan and other devices.

**Features 5 amp N/O or N/C relay contact output.**

### Adjustable Electronic Switch Boxes

Part No.	Description	Specification	Voltage
410.060	Suitable for 1 warning function	2000-10 ohms input 5 amp relay output 1 input - 1 output	24V-12/24V
410.061	Suitable for 3 separate warning functions	2000-10 ohms input 5 amp relay output 3 input - 3 output	24V-12/24V

## VDO ELECTRIC OIL PUMP

Electric Oil pump used to pump Engine or Gear Oil.

### VDO Electric Oil Pump

Part No.	Description	Voltage
405040001001	160 Litres per hour	12V

**Note:** 100°C to 150°C working temperature, 4 bar pressure.

Polarity is written on the socket.

*Plug & terminals not available.*

## RPM SWITCH ELECTRONIC

The VDO RPM Switch has been designed to work with all standard ignition systems, and will provide a negative output once a predetermined RPM has been reached. In standard format the signal will turn off once the RPM falls below the pre-set point. Dip Switches are provided to program the level of hysteresis, or alternatively latch the relay on. Applications include driving a warning light or buzzer. Compatible with VDO Mega Light 600.895. 12V applications.

Switch Box 660.990

### RPM Switch

Part No.	Description	Specifications
660.990	12V RPM switch	3 amp relay output RPM range 0-12000 rpm 4/6/8cyl
411.101	12/24V RPM switch	Switch range 2Hz - 9,990 Hz 5 amp relay contact output, 2 channels. Sine & Square wave inputs.

Switch Box 411.101

## ELECTRONIC RATIO BOX

The VDO Electronic Ratio Box is designed to divide or multiply an input frequency by a fixed ratio. The input signal could be a speedometer or tachometer signal from a magnetic pickup, alternator pickup or hall effect sender. Typical applications include correcting the speedometer on a vehicle which has had the diff ratio changed, or calibrating a tachometer which has no calibration adjustment. Suitable for 12/24V applications.

Switch Box 411.105

## SIGNAL AMPLIFIER/DIVIDER

The VDO Signal Amplifier/Divider is a general purpose module designed to work with most speedometer and tachometer signals. This box will amplify a low voltage signal to a 10V peak to peak square wave. This can be useful when a signal is too low to drive a speedometer, tacho, cruise control or any other such device. The signal may also be divided in frequency by a factor of 1, 2, 4, 8 or 16 to allow easier integration to another instrument.

Part No.	Description	Specifications
411.096	Signal amplifier/divider programmable	Signal input: 2+V p-p 0-10khz Output: 10.0V square wave
411.095	Signal amplifier/divider by 16 (permanent)	Signal input: 1>2V p-p 0-10khz Output: 10.0V square wave

### Gauge Check Tester

12V

Part No.	Description
105.001	Ohms tester for resistance gauges 0-300 ohms

Gauge Check helps the serviceman to determine whether electrical gauges fitted to your vehicle are functional and accurate without having to remove or replace them. Suitable for testing automotive, commercial and marine gauges, it comes complete with operating instructions covering test data for all popular vehicles.

Also checks fuel gauges operating with capacitance tank senders - Ford Falcon, Fairlane, LTD, 1979 - 1987.

# Senders, Switches, Adaptors

The accuracy of any gauge or instrument is dependent on the robust performance of senders, switches and adaptors. The Siemens VDO range offers the quality solutions required to meet the broad range of commercial, industrial, automotive and marine applications.

## SENDERS - to suit VDO instruments

The senders listed hereunder are for use with all instruments listed in this publication.

Selection is simple: Just match the range of the instrument with the range of the sender unit.

## PRESSURE SWITCH SPECIFICATIONS

Type:	Direct action blade contact
Terminals:	Screw Terminals
Pressure Port:	1/8-27 NPT Pipe Thread - Steel
Base:	Zinc Plated Steel
Cover:	Glass Reinforced Polyester
Wetted Components:	Zinc plated steel, polyimide film, nitrite o-ring
Contacts:	Silver Alloy
Operating Media:	Air, motor oils, transmission oils, and similar hydrocarbon media; (fuel, water and freon are specifically not recommended).
Temperature:	-20°F to +200°F
Set Point:	Factory set from 2-150 psi
Operating Pressure:	150 psi
Proof Pressure:	300 psi
Burst Pressure:	750 psi

4 psi = 28kPa = 0.28 Bar

15 psi = 105kPa = 1.05 Bar

60 psi = 420kPa = 4.2 Bar

## NOTES

# Marine Catalogue

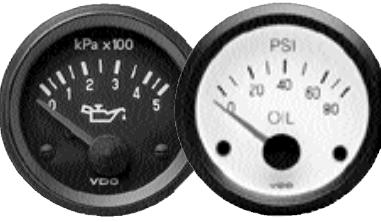

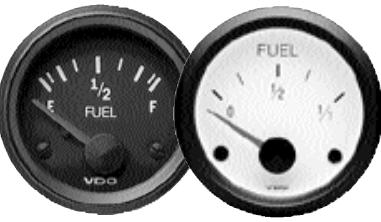

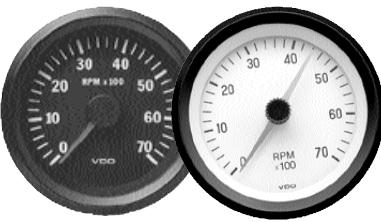

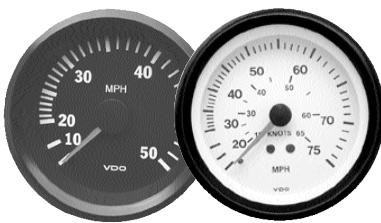

With many years of extensive experience in the development and manufacture of precision, high quality instruments, VDO has been able to develop an extensive range of marine products that have exceeded worldwide expectations.

The success of VDO Marine product ranges can be attributed to leading edge technology, easy operation and reliability.

## Cockpit Tachometer

Ignition or Alternator Signal		85mm
Part No.	Description	Voltage
333015033	7,000 rpm tacho black	12V
333.255	7,000 rpm Cockpit White tacho	12V

Suitable for 4,6 or 8 cylinder four stroke inboard petrol engines with coil pickup.  
Also suitable for all diesel and outboard engines using alternator signal pickup.

## Cockpit Fuel Gauge

Black Cockpit Vision Fuel Gauge		52mm	
Part No.	Description	Specifications	Voltage
301010011	fuel gauge - petrol	10-180 ohms	12V
301010010	fuel gauge - LPG	0-90 ohms	12V

Input:	Ocean Line Log, Ocean Line Depth, Ocean Line Wind, Ocean Line Compass	
Output:	Interface according to NMEA 0183 Output rate: 1 Data set/Sec. A maximum of 2 devices can be connected to the data output	
Data sets transmitted:	DPT	Depth from the water surface, distance between sensor and keel
	DBK	Depth below keel
	DBT	Depth below sensor
	HDG	Magnetic heading, variation
	HDM	Magnetic heading
	HDT	True heading
	MWV	Wind speed, wind direction
	VPW	VMG (Velocity made good)
	VWR	Apparent wind direction, apparent wind speed
	VWT	True wind direction, true wind speed
	VHW	True Heading, magnetic Heading, Boatspeed in kn

Voltage supply:	10,8–32 Volt
Current consumption:	< 10 mA (warning lamp off)
Operating temperature:	–25°C to +70°C
Input:	Resistor sensor (Pressure, Temperatur, supply levels)
Output:	Switch output, max. 300 mA (not short-circuit-protected)

## 5.4 Technical Data Ocean Link

### Technical Data Ocean Link Master

Operating voltage	10,5 ... 32 V DC
Current consumption	~ 120 mA w/o illumination ~ 140 mA with illumination
Illumination	Dial: red backlight dimmable; display: amber
Operating temperature	-20 ...+ 70°C at nominal voltage
Protection	IP65 from the front, Din 40050
EMC	CE according 89/336/EWG
Inputs	CAN 2.0B; SAE J1339 Analog 4 - 20 mA Analog 0 - 200 Ohm
Output	VDO Serial Bus
Dimensions	85 mm diameter 73 mm height incl. wiring harness
Connection	Delphi, GT150 sealed

### Technical Data Ocean Link Slave

Operating voltage	10 ... 30 V DC
Current consumption	< 70 mA incl. illumination
Illumination	Red, backlight, dimmable via master
Operating temperature	-20 ...+ 70°C at nominal voltage (master)
Protection	IP65 from the front
EMC	CE according 89/336/EWG
Inputs	VDO Serial Bus
Dimensions	52 mm diameter 35 mm height incl. wiring harness
Connection	AMP Superseal 1.5

# Tachometer Connection Examples

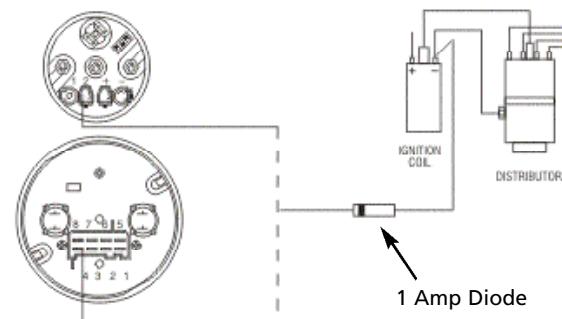

## Electronic ignition system:

Use negative side of ignition coil.

## Standard points ignition system:

Add 1 Amp diode (eg: IN4004) in-line with wire to negative side of ignition coil.

## Alternator signal pick-up:

Connect to "W" point, single phase, see diagram 1 or 2, for tacho connection.

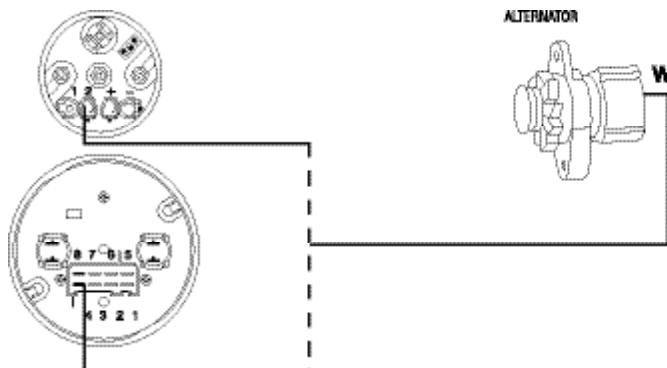

Diagram 1  
Star winding, single phase

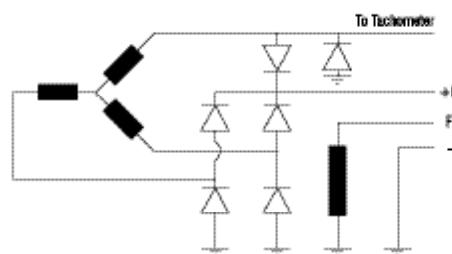

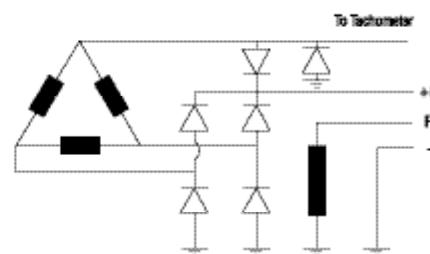

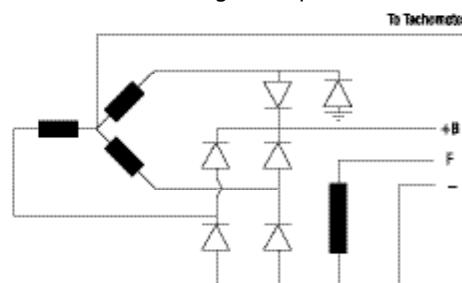

Diagram 2 Delta winding

"Star Winding" See diagram 3, will only work on a Tachourmeter, not a tachometer due to a greater calibration range.

Diagram 3  
Star winding, multi phase

# Electronic Speedometer

## Calibration Instructions

Three alternatives can be used to calibrate the speedometer but only Autocal & Pulse are recommended.

1. Function "AUTOCL" - automatic calibration by driving a measured distance of 1km.
2. Function "PULSE" - for entering a known pulse per km ratio.
3. Function "ADJUST" - for calibration using a reference speed indication (eg. Roller test bench.)

Push button in front lens and hold, switch on the ignition and start the engine. The display will alternate between AUTOCL, PULSE and ADJUST at 2 second intervals. Select function required by releasing the button when this function is displayed.

**AUTOCL**

**PULSE**

**ADJUST**

**AUTOCL**  
After selecting the AUTOCL function, the display changes to "bUttOn" after 3 seconds.  
Drive the vehicle over a measured 1km track. At the beginning of the track, push the button once. The display will now flash "StArt".  
Drive the vehicle to the end of the track and push the button once.  
The display will now show the measured pulse per km ratio. Shortly after, the display will change to the odometer or trip reading. This is an indication that the calibration was successful.  
If the display flashes "FOO" at the end of the procedure, it is an indication of no speed signal. Check the speed sensor wiring and try the calibration again.

**bUttOn**

**StArt**

**P 8000**

**T325**

## PULSE

After selecting the "PULSE" function, the display will show the stored pulse per km setting, after 3 seconds.(eg. P 8000 )

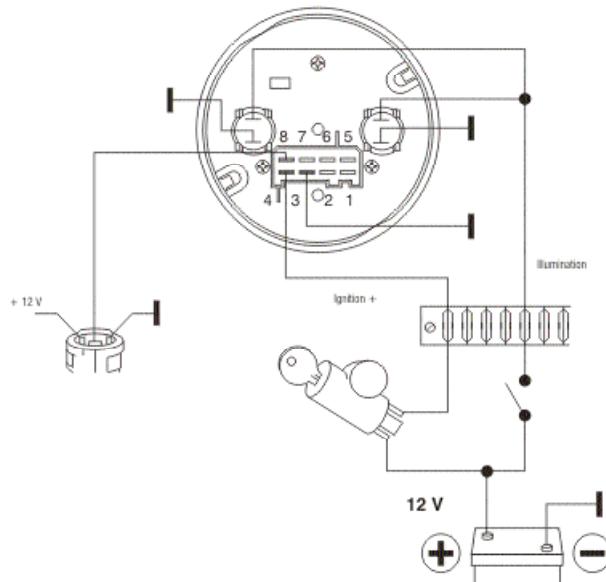

The second last digit will be flashing.  
Start entering the pulse ratio immediately. The flashing digit can be changed by pushing the button. Shortly after that digit is set, the next digit will flash and will be able to be set. This will continue until all digits have been set, at which point the display will change to the odometer or the trip meter reading.

**PULSE**

**P 8000**

**Flashes**

Note: Link terminals 6 & 8 when the Hall Effect senders needs a pull-up resistor.
