OceanLink – easy to install VDO CAN instrumentation for sports boats

VDO

Plug & Play – the fastest way to access precision engine data

Engines on modern sports and leisure boats increasingly feature electronic management. To meet these new requirements, VDO provides a modular instrumentation concept for marine use: the OceanLink. The main element and information powerhouse is a multifunctional tachometer with direct access to the engine CAN bus. The instrument can display and forward all available data to up to 20 additional satellite instruments. Instal-

lation follows the practical Plug & Play principle, making further system expansion particularly convenient, with no need for complicated programming.

Innovative technologies

Search the data horizon

VDO OceanLink

The central instrument automatically presents all the key data – up to 256 standard measurement values ranging from oil pressure and fuel consumption to operating hours – on a generously proportioned digital display. Besides a CAN interface with SAE J1939 data protocol it features two inputs for analogue sensors. The innovative Easy Link data connection renders complicated cabling unnecessary. The CAN interface also allows a second central instrument to be hooked

up for positioning on the flybridge, for example. Satellite instruments for further dynamic measurement values receive updates from the central instrument every 20ms. OceanLink is available in various designs, including a range of installation depths, metric and imperial scales, and a number of bezel colour options. The instruments can also be conveniently integrated into customer-specific panel solutions.

Facts. Functions. Figures.

Specification	Master (85 mm)	Satellite (52 mm)
Version	Translucent backlighting	Translucent backlighting
Housing	Plastic (flame-retardant) according to UL94-V0	Plastic (flame-retardant) according to UL94-V0
Bezel	Plastic, coloured	Plastic, coloured, clipable
Lens	Plastic, double lens, anti-reflection	Plastic, double lens, anti-reflection
Dial	Black with white graphics or white with black graphics	Black with white graphics or white with black graphics
Illumination	Red LED, 8 dimmer steps	Red LED, 8 dimmer steps, adjustable via master
Pointer	Translucent backlighting, black cap, white pointer	Translucent backlighting, black cap, white pointer
Display	132 x 33 dots	
Connections	DELPHI connector, GT 150 Series	AMP connector 282105-1, Super Seal 1.5 Series
Installation	Housing nut, nut jam height 0–17 mm	Mounted from the front, housing nut, nut jam height 0–12 mm, studs 12–25 mm flush mount: for 3 mm panel thickness with mounting angle, screws and studs on panel gasket $\text{Æ}51.5 /$ $\text{Æ}60 \times 2$
Indication area	3,000, 4,000 and 5,000 rpm	270° (depending on satellite functionality)
Nominal voltage	12/24 volts	
Nominal position	0–90° angle, according to VDON 2.700.1	
Operating temperature	–20 °C to +70 °C (at nominal voltage)	–20 °C to +70 °C (at nominal voltage)
Storage temperature	–30 °C to +85 °C	–30 °C to +85 °C
EMC	DIN EN61000-6-1/2/3, EN61000-4-3, EMC Directive 2004/108/EC	DIN EN61000-6-1/2/3, EN61000-4-3, EMC Directive 2004/108/EC
Protection class	IP65, mounted from the front according to IEC 529	IP65, mounted from the front according to IEC 529
Max. no. of satellites		Max. 20 gauges and 20 m cable length connected to master
Current consumption	120 mA without, 140 mA with illumination	< 70 mA with illumination
Data transfer		Easy Link bus uni-directional from master to satellite
Power supply	10–30 volts
